

## CARPETLIGHT DMX VALUE MATRIX

With firmware version 4.0 or higher the CL-series features dimming and fading in three different modes: 8 Bit linear, 8 Bit exponential and 16 Bit linear:

Brightness in % per DMX value in linear and exponential mode.

The following table provides DMX values and the respective brightness values for both modes:

### DMX / Brightness / Display value for linear and exponential dimming modes:

DMX value	DMX percentage	Brightness (display value) linear mode	Brightness (display value) exponential mode	DMX value	DMX percentage	Brightness (display value) linear mode	Brightness (display value) exponential mode
